## DETAILED ACTION

### *Response to Amendment*

1. Applicant's amendment filed February 24, 2006, has been entered. Claim 1 has been amended and claims 15-33 have been cancelled as requested. Thus, the pending claims are 1-14.

### *Claim Rejections - 35 USC § 103*

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-14 stand rejected under 35 USC 103(a) as being unpatentable over US 4,897,989 issued to Gray as set forth in section 4 of the last Office Action.

Applicant has amended independent claim 1 to limit "at least a portion of said tufts *consisting essentially of* groups of continuous filament non-textured fibers" rather than the previous transitional phrase of "*comprising*." Applicant asserts that said amendment distinguishes the present invention from the Gray invention in that Gray employs tufts of a three-ply yarn comprising one textured yarn and two non-textured yarns (Amendment, page 4, 4<sup>th</sup> paragraph). The examiner respectfully disagrees since applicant's claims do not necessarily exclude the tufts from containing textured fibers. Specifically, the limitation of "*at least a portion of* said tufts *consisting essentially of* groups of continuous filament non-textured fibers" allows for other portions of the tufts to consist of textured fibers.

Additionally, the transitional phrase "consisting essentially of" limits the scope of a claim to the specified materials or steps "and those that do not materially affect the basic and novel

Art Unit: 1771

characteristic(s)” of the claimed invention. *In re Herz*, 190 USPQ 461. For the purposes of searching for and applying prior art under 35 U.S.C. 102 and 103, absent a clear indication in the specification or claims of what the basic and novel characteristics actually are, “consisting essentially of” will be construed as equivalent to “comprising.” See *PPG Industries v. Guardian Industries*, 48 USPQ2d 1351. If an applicant contends that additional steps or materials in the prior art are excluded by the recitation of “consisting essentially of,” applicant has the burden of showing that the introduction of additional steps or components would materially change the characteristics of applicant’s invention. *In re De Lajarte*, 143 USPQ 256. Therefore, applicant’s argument is found unpersuasive.

Applicant also argues that one would not have been motivated to eliminate the textured fiber of Gray since the reference teaches said textured fiber is an essential component of the invention (Amendment, page 4, 5<sup>th</sup> paragraph). In response, it is noted that one need not be motivated to eliminate the textured fiber since the present claims do not exclude said textured fiber. Therefore, the rejection of claims 1-14 over the cited Gray reference stands.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 1771

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
